

## Avery Weigh-Tronix

**DW Series** The Drum Weigher is built for strenuous work and safety. Whether part of a conveyor system or at work by itself in a busy warehouse, the Drum Weigher is the right tool for handling drum weighing, filling, and general weighing applications. The weighing surface is only 11/2" high for easy and safe loading and unloading. Capacity is 1,000 lbs.

Scale come in carbon steel or stainless steel.

### DS1000

**Construction** - Powder coated rugged steel with smooth top plate surface and two handles and wheels to easily relocate. Adjustable foot pads to work effectively on uneven floors. Built-in ramp ends for recessed floors

**Low Profile**- 2.5 inches

**Accuracy** - Provides consistent accuracy within 0.1% and comes equipped with a simple to operate indicator for fast LED digital readout.

**Easy Assembly** - No installation costs or parts that require maintenance. Just place the scale on a hard surface and level by adjusting the foot pads. Connect the power and you're ready to go

**6900 and 6950** Ideal for plants where space is at a premium. Low 1- 1/2 inch profile with live side rails. Rugged construction makes the 6900 series the ideal for years of dependable and accurate weighing. No matter what you weigh the 6900 series will out preform the competition in a wide range of applications.
